DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, are drawn to a method for running an algorithm, classified in class 380, subclass 28.
 - II. Claims 9-15, are drawn to a programmable processor for reducing signal distortion, classified in class 375, subclass 240.27
 - III. Claims 16-19, are drawn to a scalable programmable processor, classified in class 382, subclass 307.
 - IV. Claims 20-26, are drawn to an MPEG-2 decoder, classified in class 375, subclass 240.20.
2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as performing mathematical functions or analysis as part of a computer or computational system. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2613

4. For the purpose of examination, the Examiner would like to inform Applicant that Groups 2 and 4 are classified in his Art Unit. Groups 1 and 3 will most likely be transferred to another.
